Specialisation: Applied Econometrics, Agricultural & Development Economics

Research Summary

Applied economist specializing in applied econometrics, agricultural and development economics, productivity analysis, and policy evaluation. Experienced with large-scale national and international microdata and advanced econometric models (panel data, stochastic frontier, spatial econometrics, and gravity models). Published peer-reviewed research, contributed to policy reports and funded projects, and collaborated with government ministries and research institutions. Skilled in reproducible research workflows using Stata, R, and Python.

Key Research Skills

- **Econometric Methods:** Panel data analysis; stochastic frontier analysis (SFA); data envelopment analysis (DEA); gravity models; spatial econometrics; impact evaluation
- **Quantitative Tools:** Stata; R; Python; SPSS; EViews; Tableau; Power BI; ArcGIS; QGIS
- **Datasets:** NSSO; ASI; NFHS; CMIE; WDI; WITS; ITC Trade Map; UN Comtrade
- **Research Areas:** Agricultural productivity; climate risk & adaptation; trade policy; technology adoption; development policy

Current Position

Jamia Millia Islamia

Assistant Professor & Researcher

New Delhi

Aug 2024 – Present

- Conduct independent and collaborative research integrating national microdata with advanced econometric techniques.
- Teach and mentor on applied econometrics and data-driven policy analysis.
- Supervise postgraduate research projects focused on empirical modelling and policy impact.

Research Experience

ICAR–National Institute of Agricultural Economics & Policy Research (NIAP)

Research Associate

New Delhi

2018 – 2024

- Led empirical research on agricultural productivity, climate risk, market efficiency, and technology adoption.
- Produced 10+ peer-reviewed publications and contributed to national-level policy reports.
- Applied advanced panel econometrics, stochastic frontier, and spatial models using NSSO, ASI, NFHS, and CMIE data.
- Developed reproducible research pipelines in Stata, R, and Python.

Ministry of Commerce & Industry, Government of India

Young Professional (Economics & Trade Policy)

May 2022 – Jul 2022

- Conducted trade cost and efficiency analysis using gravity models and international databases (WITS, ITC Trade Map, UN Comtrade).
- Prepared policy briefs on export competitiveness, regional integration, and trade strategy.

National Academy of Agricultural Sciences

Research Associate

New Delhi

2021

- Contributed to studies on agricultural productivity and technology adoption using econometric methods.

Education

Aligarh Muslim University

Ph.D., Industrial Economics

2015 – 2018

Thesis: *Performance of Sugar Mills in India: A Comparative Study of Uttar Pradesh and Maharashtra*

Aligarh Muslim University

M.Phil., Industrial Economics

2013 – 2015

Aligarh Muslim University

M.A., Economics (Econometrics & Mathematical Economics)

2009 – 2011

Aligarh Muslim University

B.A. (Hons.), Economics (Mathematics & Statistics)

2006 – 2009

Research Grants & Projects

Co-Principal Investigator, ICSSR Minor Research Project

2025 – Present

Assessing the Impact of Jal Jeevan Mission on Rural Health Outcomes using mixed-method evaluation.

Books and Book Chapters

- **Abdulla** (2025). *Spreadsheet Modelling (MBA-1008)*. Centre for Distance Education, Aligarh Muslim University.
- **Abdulla, Kumar, S., & Singh, D.** (2019). Total factor productivity using stochastic frontier production function. ICAR–National Institute of Agricultural Economics and Policy Research (NIAP).

Academic Service & Professional Engagement

- Peer reviewer for international academic publishers, including Springer Nature and Emerald Publishing, and others.
- Co-Organising Secretary, International Conference on Digital Banking & Sustainable Finance (2025).
- Member: International Association of Agricultural Economists (IAAE); Indian Economic Association.
- Delivered invited lectures on advanced econometric methods and microdata analysis at AMU, NAARM, University of Calicut, and JMI.

Conference Presentations

- International Conference of Agricultural Economists (ICAE) 2024: Spatial Analysis of Climate-Induced Agricultural Risk
- Indian Economic Association (IEA) Annual Conferences: Presentations on efficiency, productivity, and policy studies
